

Dear Sirs

After reading several articles regarding the NAB petition to stop satellite radio from providing local content, I have tried to look at the subject with an unbiased eye. I read an article from the CATO institute stating how the NAB is looking for unreasonable legislation. I attempted to find a counter argument at the NAB website but, curiously, found nothing. I can only assume that they have little to stand on.

Please do what is in the best interest of the American people with respect to the public airwaves and deny petition 04-160.

Respectfully
Shannon Kelman
